## Property App Setup Guide

# DOWNLOAD

## Get the apps

Buying a home is competitive — the best properties often sell quickly.

By downloading the realestate.com.au and Domain apps and setting up alerts, you can:

- ✓ **See listings first** – Get notified the moment a new property in your area is listed.
- ✓ **Stay organised** – Save your favourite suburbs and searches so you don't have to start from scratch every time.
- ✓ **Never miss an inspection** – Receive reminders about open homes and auctions directly on your phone.
- ✓ **Customise your search** – Filter by price, bedrooms, property type, or even special keywords.
- ✓ **Make faster decisions** – With instant alerts, you can book inspections or speak to your broker before other buyers act.

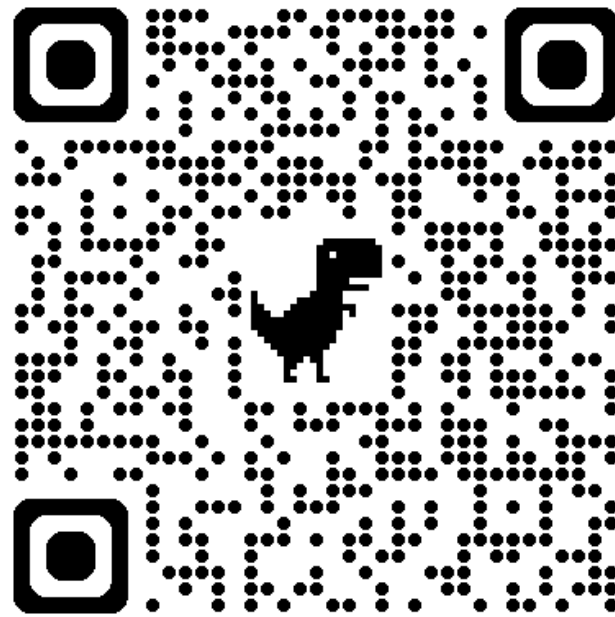

**In short:** Setting up these apps keeps you one step ahead and makes the buying journey smoother and more efficient.

## Find the agents

- Book mark their websites
- Get on their email lists
- Get on their SMS lists
- Follow them on social media

They want to sell properties just as much as you want to buy one.

**\*\*Warning: They may hound you but you will not miss a property\*\***
